

**S**aints: Cawg  
 His sister of Saint Congar lived a life of quiet solitude and private joys. Once when she visited her brother in his hermit's cell he refused to see her, fearing that even the light of his sister would prove a distraction. To prove her holiness, she fastened a wild boar, and miraculously carried him to obey her like a pet. He accepted it as a sign.

**P**ronostycation  
 The winds will be windy when from the NW, NE and SW, and strong when in the S. Butter shall melt with the extreme heat of Summers and those that are hanged shall never live to be drowned. Effusions have great import with stars in Taurus; double may be tided between lord and lady. Look for one who is big in face, large strong shoulders, great mouth and thick lips, goggle eyes, black rugged hair, lips in V, nose marks the sign of the Pelican, with civet and responsibility, jolly rewarded in shape and fortune is found a girl that will joyce, all members inking to be wry, a witty direct soul, judicious and excellently well spoken, shrewd and given to libor, wicket Man or Woman.

PRONOSTYCACTON

The winds will be hotte when NW, windy when NE, coole when SW or S. Of wheats, wines, fruits, and vegetables never have this many been seen, if the wishes of poor folk are heard. Mercury in Capricorn shows the need for planning and direction. Saturn in the Crabbe says that self-control will rule your days. The north node in Taurus shows you wish the company of your peers, but let not self-feruice be your motivation. As for Travell, and whether such a Country, City or Kingdom will be healthfull or prosperous unto you, know that Venus in the Ascendant means you may safely travell or sojourn unto Canterbury Fayre.

Saints: Thomas Sherwood

A draper's assistant, born of Catholic parents in Protestant England, Thomas was condemned to the Tower of London for his faith, and tortured to obtain the place from whence he had attended Mass, and while therein he ministered to other prisoners. He overred that Queen Elizabeth was excommunicate and denied her supremacy over the Church. He was martyred 7 February 1578 by dragging, hanging, drawing, beheading and quartering.

The Anatomy of Man's Body as govern'd by the Twelue Constellations

No part of man's body ought to be touched with the Chirurgicall instruments, or cauterie, when the Sunne or Moone, or the Lord of the Ascendent, is in the same signe that ruleth that part of man's body.

At this time look for the Kings Evil, sore Throats, Wens, Fluxes of Rheumes falling into the Throat and Quizzies. And with the Moone in Cancer, check for Welks, Pimples in the Face, Small Pocks, hare Lips, Polypus, (noli me tangere) Ring-worms, Falling-sickness, Apoplexies, Megrims, Tooth-ach, Head-ach and Baldnesse.

If the signe be for the Pestilence, the Pluresie, the Phuresie, the Squincie, or for a Continuall headach, proceeding of cholere or bloud; or for any burning Ague, or extreme paine of partes, a man may not so carefully they for a chosen day by the Almanacks for that in the meane tyme the pacient perhaps may dye. For which cause let the skilfull Chirurgion open a veine, vnesse he finde the pacient verie weake, or that the Moone be in the Same Sygne that governeth that part of man's body.

Seekeit thou a Chirurgion for your ills, a water-bearer for your thirst.
